EDUCATION

San Jacinto College
Associate of Science, Computer Science
Graduated Summer 2022

EXPERIENCE

Customer Service Rep – Houston Health Department   Jan 2021 – Present
- Displayed leadership abilities and communication skills while placed as the Covid-19 vaccination team lead. Provided multiple customers responses to inquiries in a timely manner and maintained customers' accounts in databases.
- Processed over 100 clients daily through data entry in ImmTrac – Statewide Immunization Registry.
- Performed data analysis by identifying errors in Salesforce and correcting them on the administrative end.

Survey Engineer Intern – KFW Engineers & Surveyors   Oct 2019 – Feb 2020
- Performed very accurate and detailed field surveys of varying terrains using professional land surveying equipment while analyzing previous maps, physical documents, and other terrain documents.
- Assisted in measuring and creating field drawings using a computer-aided drawing software
- Performed calculations to determine the earth's curvature and error of surveying equipment.

PROJECTS

Video Game - Pokemane   Winter 2023
- Pokemane is a basic Pokémon-style game that was designed and coded using HTML and Vanilla JavaScript. Explore the Texas shaped map and battle against other Pokemane characters on my portfolio website.
- Worked independently and reviewed source code to assure quality and precision of work.

Weather App Project   Spring 2023
- My weather app is a cutting-edge tool that leverages geolocation to provide localized weather forecasts with the utmost accuracy. With its innovative maps feature, users can also explore current weather conditions from around the world.
- As the sole developer of this project, I dedicated myself to ensuring that every aspect of the app was of the highest quality and precision.

Clock App Project   Winter 2023
- As part of my ongoing pursuit of innovative web development solutions, I created a responsive web app using Vanilla JavaScript that enables users to display their current time-zone and toggle between standard and military time.
- Worked independently and reviewed source code to assure quality and precision of work.

SKILLS/CERTIFICATIONS

- Responsive Web Design Certification – freeCodeCamp
- Experience with HTML, CSS, JavaScript & Java
- Programming Fundamentals I & II
